## THE NEWS OF THE DAY.

### A FEW BRIEF PARAGRAPHS FOR BUSY PEOPLE.

**The Floutan and Jetson of the World**  
Around us Portraved in Condensed Items, Which Treat of Men and Things in a General Way.

In Hamburg the authorities tax a dog according to its size.

An agitation has been started to abolish private lunatic asylums in England.

The Mikado mine produced over \$17,000 in gold from sixteen days' run of the 24-stamp mill.

In South Africa there is a great demand for donkeys, as they are proof against climate, plague and flies.

Thirteen thousand gallons of whisky are said to be on the way to Klondyke. That will certainly be a good locality in which to take the gold cure.

Russia is said to own 30,000 horses, or nearly one-half of the whole number in existence. Most of them belong to the peasants of that vast empire.

Manchester supplies both gas and electricity. For the year ending March last the net profit from the former was \$85,328, and from the latter \$18,812.

A new apartment house has just been completed in New York which is named "The Klondyke." Evidently the owner expects great things from his investment.

A whale recently captured in Arctic waters was found to have embedded in its side a harpoon belonging to a whaling vessel that had been out of service nearly half a century.

In a total population a little over 3,000,000 Switzerland now has over 1,000,000 depositors in savings banks, with an average for each family of \$275 in cash deposits.

Nevada is the most sparsely settled state in America. There are nearly two and a half square miles to each inhabitant; next comes Idaho, with one inhabitant to each square mile.

It is pleasant to know that the man who discovered the American Beauty rose is worth \$50,000 all of which he made out of the perfect flower, which unites all the qualities of a perfect rose.

A scientist declares that the fine complexion of English girls is due to the logs which so frequently sweep over Albion. Dampness seems to permeate the flesh and keep the skin soft.

It is now generally believed that the missing county treasurer of Frontenac county, Ont., has committed suicide. Street railway bonds valued at \$5,000 and \$20,000 in cash cannot be accounted for.

The Russian photographers have a strange way of punishing those who, having received their photos, do not pay their bills. They hang the pictures of delinquents upside down at the entrance to their studios.

A sanitary Bible for the use of court rooms has just been put on the market, says the Medical Record. It is bound with white celluloid instead of leather, and it can therefore be washed and disinfected from time to time.

What professes to be the smallest recorded specimen of the equine race is now on view in Milan. It is the property of the Marchioness Carcano, and is said to stand only six hands, or twenty-four inches high. The smallest Shetlands are seldom under eight hands.

After several unsuccessful attempts and three years' labor the unparalleled feat of cutting a ring out of a single diamond has been accomplished by the patience and skill of M. Antoine, one of the best known lapidaries of Antwerp. The ring is about six-eighths of an inch in diameter.

The stock of Bank of England notes which are paid in five years' bills 13,400 boxes, which, if placed side by side, would reach over two miles. If the notes themselves were placed in a pile they would reach to a height of five miles. They weigh ninety tons, and represent \$7,750,000,000.

The ocean contains several fish which cloth and adorn themselves. The most conspicuous of them is the antennarius, a small fish frequenting the Sargasso sea, which literally clothes itself with seaweed, fastening the pieces together with sticky, gelatinous strings, and then, as it were, holding the garment on with its fore fins.

One objection to the use of X-rays in examining baggage is that these rays will spoil any photographic plates the traveler may have happened to have picked up. Glass or metal bottles can be detected by the rays, but not their contents. One cannot tell, for instance, whether they contain orange water or Cognac. It is expected that the application of the rays will have to be abandoned.

It is a fact not generally known that the first and the last stand of the confederates were made on land owned by the same man. A part of Bull Run battlefield was owned by Mr. McLean. After this famous battle he decided to move to a locality where there would be less fear from the ravages of war. By a strange coincidence he took up his abode at Appomattox, which subsequently proved to be the final battlefield of the civil war.

Wild horses have become so much of a nuisance in Northern Arizona that Attorney General Frazier has been asked if they may not legally be slaughtered. That vicinity has been overrun by several large bands, hundreds in number, unbranded and unclaimed by any one. They have rapidly increased in numbers and become wilder than deer and vicious as well. The matter has been referred to the live stock board.

Acting upon the idea that mice are very sensitive to music a Belgian manufacturer has substituted a musical mouse-trap for the common trap. Instead of baiting the apparatus with a bit of cheese or lard the inventor has hidden in a double bottom a music box, which plays automatically various popular airs of the country. The mice, he insists, are drawn irresistibly toward the music box, and in order to hear better they step into the trap and find themselves prisoners!

Three years ago a terrible land slide occurred at St. Alban's Port Neuf county, Que., by which several families were entirely lost. The event is recalled alarmingly by a second though smaller land-

slide, which occurred at the same spot a few days ago, the extent of which is fifteen to eighteen acres in length by six or seven wide. The River St. Anne is completely blocked. There is great consternation among the inhabitants in the vicinity, who fear a further calamity might happen.

### BURNED TO DEATH.

Three Tramps Perish Miserably in a Lock Up.

A special to the Grand Forks Herald from Conway, N. D., says: This usually quiet place was the scene of a vicious fight the other afternoon between the marshal and a crowd of hoboes who had just reached town. The men commenced looting the stores in a wholesale manner and while one of the men engaged the proprietor or clerk in a conversation which usually ended in an altercation the other members of the crowd would help themselves to everything of value that could be secured. The marshal tried to arrest the leader without trouble, but they at once showed fight and three of them were landed in the town jail only after a hand to hand fight that lasted some time. The trio went into a drug store and helped themselves to all the liquor they wanted, and then going out on the street one of them commenced making a disturbance. The marshal undertook to arrest him. The other two interfered and the marshal had his hands full with the desperadoes. He finally used his billy on two of them and brought the other down with a missile from his revolver which took effect in the man's neck, but which did not prove a serious wound.

That night it was discovered that the jail was on fire and the hose company soon had a stream of water turned into the building. The blaze was soon extinguished but not until one of the unfortunate prisoners had been burned to death. Another member of the gang died about four hours after being removed from the burning building. He was unconscious or crazed with his burns until death relieved him. The third lived until the following afternoon, when he too died in terrible agony. He was conscious almost to the last, but refused to give his name or those of his comrades, or to tell where they came from. It has been learned since that their names were respectively Welch, Murphy and Dady, but nothing is known as to their people or place of residence. The three men are certainly the worst desperadoes that ever struck our town and the end seems to have been a deserved one. The men are all strangers here, and are supposed to have come to this section for the harvest. They have done no work, however, and have made life a burden for those living in the neighborhood. It is supposed that the building was fired by one of the prisoners with the expectation of being rescued before being exposed to any great danger. There are various theories as to the origin of the fire—one being that a lighted match dropped in the hay on the floor outside of their cells did the mischief.

A coroner's jury was summoned and an inquest held, the verdict being that the men came to their death by means of a fire started by themselves.

### INTERESTING MURDER TRIAL.

The X Ray Machine to Play an Important Part in the Evidence.

The trial of Edward C. Haynes, the private in the Ninth Infantry, stationed at Jackett's Harbor, who is accused of the murder of Mrs. Mary Daly and Mrs. Wilbur Crouch, began in Watertown, N. Y., the other morning before Judge Wright. The crime was one of the most terrible ever committed in Northern New York. On the evening of April 15th, Haynes, alias Allen, engaged a rig from a liveryman. He went to the barracks and got Mrs. Wilbur Crouch and Mary Daly, two domestics employed by Lieut. Anderson, and took them for a drive. Early the next morning the rig returned to the livery stable and the bodies of the two women were found therein, having been shot. Half an hour after the arrival of the rig at the livery stable, Haynes staggered into the mess hall in a fainting condition with a number of bullets in his body, and accused Wilbur Crouch, the husband of one of the murdered women, of committing the crime. Crouch was placed under arrest and brought to the city and jailed, but was liberated on May 15th, when the grand jury indicted Haynes. One interesting feature of the trial will be that for the first time since its invention, the working of the X ray machine will be offered in evidence, and the defence will have as a witness, Dr. Gilbert Cannon, of New York, who applied his X ray machine to Haynes. Both the prosecution and defence offer considerable expert testimony on the trial.

### New Voting Machine.

A new voting machine has recently been exhibited at Norwich, England, which has attracted much attention there. The London Times in describing it says that ballot papers are printed on stout cards, circular in shape, attached to their counterparts and bound in books in much the same manner as ballot papers now in use. When the circular ballot paper (card) is handed to the voter, he is directed to enter a screened-off apartment, where he sees a row of small boxes on a frame, each box bearing the name and number of the candidate it represents, and, if thought advisable, his party colors. On the top of each box is a slot, with a directing ball and pointer above. The voter without making any mark on the ballot paper or folding the same, places it in the slot of the box representing the candidate for whom he desires to vote. In a few seconds he sees his card appear within a small glazed opening below, and is able to satisfy himself it bears the number or, if wished, when arranging the apparatus, the name of the candidate he has voted for. His vote having thus been cast he leaves the polling station. Each of the boxes contains three rollers. The central one below the slot in the top of the box is provided with movable type or a fixed number, as may be required. Of the other rollers one is a pressure roller to force the ballot papers against the type; the other is the ink roller to ink the type. This axle is turned by means of a small crank or handle conveniently situated, or by other suitable means. Both sides of the card pass under official observation after which it drops into the ballot box, where it remains under seal until the box is opened in the presence of the returning officer for the count. The count can be effected with great expedition.

Nothing Big Except His Name. His name is the biggest part there is about Clarence George Wesley Trapp, of St. Louis, Mo. If a person should take Clarence George Wesley's name and write it in ordinary longhand, it would be longer than Clarence George Wesley himself is, for that person can brag of a stature of only eight inches. He weighs one pound, and is supposed to be the smallest child ever born alive and healthy. Someday Clarence George, etc., may grow up to fit his name, but at present the handicap on him is considerable.

### A RICH FIND IN B. C.

A Quartz Vein on Ganer River that Will Go \$5,000 or \$5,000 to the Ton.

The principal of a well known firm in Winnipeg and Regina has addressed the following letter from Arrow Head, B. C., to the Free Press man at Regina: "I send you this that you can have the honor of reporting the greatest gold strike ever discovered in Canada. A prospector was working on a claim at the head of Ganer Creek and came across a gold bearing quartz vein. He picked a piece out of the vein and found free gold, so rich that he hardly knew whether he was dreaming or not. When he found it was a reality he at once started for Sandan without saying a word to anybody until he found his brother and two friends. They all went to the find and staked the whole of the lead that was in sight. You may guess those young fellows did not sleep a long time in getting there as it is about one hundred miles from Sandan to the find. They kept the whole thing quiet until they had the ground staked and recorded and had made their first blast. When they showed their samples the news went round the mountains like wild fire. In a few hours there were prospectors rushing to the claims and staking all kinds of ground and this is still going on. Crowds are hunting this part of the country, as they say there must be more there because they are finding nuggets in all the creeks in this part of the country. This particular find is at the head of Ganer Creek. You start from Arrow Head and go to Thompson's Landing by boat, and then you can go to Trout Lake by stage or horseback, or walk. It is only twelve miles, and the road is good from Trout Lake to Ferguson's four miles, and from Ferguson's you go to a place they call Ten miles. Then you go to Ganer Creek to a mine they call Bad Shot, some seven miles, and that seven miles will take you 8,000 feet up the mountain. It is as fine a sight as a man could wish to see, that is he likes mountain scenery. I rode that seven miles on horseback. It was an exciting ride, as one slip and down you would go a thousand feet. Of course that would be your last tumble. There is, however, a good path from Ten Miles to the summit. When you get to the Bad Shot silver mine this new gold field is one mile south. The gold vein was four inches at the top, but they are now down nine feet and it has widened to sixteen inches, getting richer and richer. They are bringing a ton of the gold ore by pack mules and in a few days will know what it is worth. The gold seems to be distributed all through the quartz and is supposed to be worth from \$5,000 to \$8,000 a ton. It is wire or thread gold. In fact I have never seen so rich a find in all my life. The persons mentioned were all poor young men, but to-day they are without doubt millionaires. I would say from the gold that is in sight, and the silver and lead and copper, that the Trout Lake district is the new Klondyke of British Columbia."

### CAUGHT IN THE ICE.

The Government Steamer Diana Suffers Considerable Damage.

A letter just received at St. John's Nfld., from one of the crew of the whaler Diana, which is conveying the Dominion government scientific expedition to survey and explore Hudson Strait and Hudson Bay, reports that the steamer was nearly lost on July 1. The vessel was caught in heavy pack ice, which ripped her sides, throwing up her decks and breaking her rudder. The ship continued in this condition four days, and the crew, fearing that she would sink, placed a supply of provisions and clothing in the boats and got the latter upon the ice, intending to make their way towards the land, and then proceed southward along the Labrador coast, until they should be picked up by a Newfoundland steamer. Fortunately the ship escaped a heavy squeeze, and when the ice opened, did not leak. But for the fact that the Diana is the best of the Newfoundland whaling fleet, she would never have withstood the pressure.

A Halifax dispatch gives the following news of the H. B. expedition steamer Diana:

"The barque Maggie, recently arrived at Nachvak, Labrador, where she discharged a cargo of coal on board the Dominion's Hudson Bay expedition steamer, Diana, brings the first news received from the Diana since her departure from Halifax in May. About July 15th, the Diana got tipped in the ice near Fox Channel. Her rudder was carried away and part of the ship was holed by the heavy ice. The ship was held captive for four or five days. After she got free, a new rudder was shipped and the vessel continued her voyage, landing the members of the expedition on both sides of the bay. The Diana left Nachvak on Aug. 13th for Cumberland Inlet and will proceed from there to Fort Churchill. Returning she will pick up the members of the expedition and proceed to St. John's for coal and return to Hudson's Bay in October and ascertain the latest day those waters are open to navigation. The object of the expedition is to determine if the waters of Hudson Bay are navigable for grain steamers during the summer months."

### Awful Death Rate in Cuba.

During the month of August 500 persons died in Guines, Cuba, from epidemic diseases. All of the victims with one exception, were Cubans. The rate of mortality among the refugees was very great and the same is true regarding the troops. The mortality is due to yellow fever, malaria and dysentery. It is estimated that 37 out of every 1,000 of the sick soldiers in the hospitals throughout the island die. It is stated that from 20 to 25 deaths occur on each trip of the steamers which carry sick and disabled troops from Cuba to Spain. The bodies of those who die en route are thrown overboard. Three deaths occurred on one of these steamers recently before she left port.

### Nothing Big Except His Name.

His name is the biggest part there is about Clarence George Wesley Trapp, of St. Louis, Mo. If a person should take Clarence George Wesley's name and write it in ordinary longhand, it would be longer than Clarence George Wesley himself is, for that person can brag of a stature of only eight inches. He weighs one pound, and is supposed to be the smallest child ever born alive and healthy. Someday Clarence George, etc., may grow up to fit his name, but at present the handicap on him is considerable.

Rest satisfied with doing well, and leave others to talk of you as they please.

### SAVED HIS BOY.

A PLAIN STATEMENT FROM MR. 'ROBT. McLEOD, OF GALT.

His little son was paralyzed on one side, and Doctor's Treatment Did Him no Good.—Dr. Williams' Pink Pills Were Given and Effected a Thorough Cure.

Mr. Robt. McLeod is a gentleman well known in the town of Galt and throughout the district. In conversation with a member of the reporter staff recently, he consented to make public the facts concerning the illness and restoration to health of his little boy. He said:

"Yes, I believe that had it not been for Dr. Williams' Pink Pills my little boy would not have been living to-day. Willie who is ten years of age, was taken with an illness that developed into paralysis of the left side. He had the best medical aid within my reach, but nothing seemed to benefit him. He got so bad that a pin could be run in his left hand to the bone without his feeling it in the least. If he attempted to walk, he could only get over the ground by dragging his left foot behind him, he had no power in it whatever. One night I was feeling pretty blue about him. I felt that was going to be an invalid all his life, and I viewed things in their worst light. On this particular night I put on my hat with the intention of going out to take a quiet walk, but just as I got to the door I saw lying on the step a pamphlet. I picked it up lightly, and saw it was an advertisement of the Dr. Williams' Medicine Co. I only read a few words when the conviction seized me that here was something that might possibly benefit my boy. I at once went down to Mr. Foran's drug store and purchased a box of the pills. By the time he had taken two boxes the color came back to his head and arm, and by the time he had taken half a dozen boxes he was cured, and now he is better than he ever was before in his life, and as hearty and strong as any boy in the town. Yes, sir, I believe Dr. Williams' Pink Pills are a wonderful medicine."

### NO PARALLEL ON RECORD.

The Unfortunate Condition of Gen. Seymour—A Hypnotic Subject.

Chicago Tribune's Binghamton, (N. Y.) special: Either Gen. Seymour is the most expert fraud since the time of the famous "Dummy Chucker," who was exposed by Dr. Carlos Macdonald in the state asylum for the criminal insane at Auburn, or else he is one of the most unfortunate of living men. As a matter of fact the man is not living in the same way the word is ordinarily used. For five weeks he has been in a state of profound coma.

His case has no exact parallel in medical records. It has baffled the most advanced scientists. He is supposed to be a victim of hypnosis, and what is strange, the victim of his wife. Both are charged with horse stealing, and there isn't the slightest doubt that Seymour's condition is the result of the charge against him. During the five weeks the man has been in the apparent state of trance he has been partly awakened only once, and then by the severest methods.

The man has been a hypnotic subject for years. For months prior to his arrest he made a living in this way. He traveled with hypnotists who went from place to place giving exhibitions. He was a remarkably good subject. During a stretch of forty-two weeks Seymour was placed in a trance two or three times each day except Sunday.

Seymour met his wife a few years ago while he was travelling with an exponent of hypnosis. She was a variety performer. She is pretty, and she knows a deal more than a girl of eighteen is supposed to know. One day when Seymour appeared to be in full possession of his faculties than usual he told an attendant he was the tool and creature of his wife. Seymour started to tell about the different shady and criminal transactions with which they had been connected, when his wife came into the room. She looked at her husband and demanded to know about what he had been talking.

His jaw dropped and he looked at her as a whipped dog looks at his master. She repeated her question and he answered her truthfully. The woman moved to hiss, she fastened her flaming eyes upon him. She muttered something and waved her hand. Seymour had sunk back in his cot as if he had been stunned by a blow. The prison physician says of the case:

"The man is in a condition which we at first supposed to be hysteria, but it is not. All we know about the case is that Seymour is in some kind of hypnotic sleep. The theory is that during the forty-two weeks that Seymour spent as a professional hypnotist's subject he became so accustomed to go into the hypnotic sleep, that at last he was able to go into it without the hypnotist. This is what is called autohypnotism. How long this state is likely to continue cannot be told. Cataleptics have been known to sleep for fifteen years. John Quinn, a cataleptic at the state hospital for the insane, slept twenty-two months. He died soon after he awoke. Seymour is not a cataleptic."

### Cancer Cured by Lizards.

An Austrian priest named Gentillini claims to have discovered a certain cure for cancer by means of eating lizards. By this extraordinary remedy he is said to have already cured thirty patients afflicted with cancer. In this connection it may be added that recent investigations have resulted in the discovery that both toads and lizards possess beneath the surface of their skins certain secretions which constitute an extremely powerful chemical agent, so that the use of these reptiles for medical purposes in China and other parts of the Orient, is not so ridiculous as at first imagined.

The readiest and surest way to get rid of offense is to correct ourselves.—Demosthenes.

### "FELL DEAD."

What More Everyday Heading do you Read in This Paper than that?—They are Legions.

Don't dally with heart-diseases. There is but one cure. "I had been for a number of years, slowly afflicted with heart disease. At times my life was despaired of. Doctors had prescribed, and I had taken every known heart remedy, but I had no success, and did not get any better. I read of the wonderful cures wrought by Dr. Agnew's Cure for the Heart. I procured a bottle, and in less time almost than it takes to tell it, the distress was relieved. I followed the directions closely, and today I am a well woman again, and I shall do all in my power to make known to every one suffering as I did the wonderful cure it worked for me. Mrs. Wm. Burton, Dartmouth, Ont."

Nothing is so great an instance of ill-manners as fatigues. If you fatigue all the company you please none. If you flatter only one of two, you offend the rest.—Sallust.

### A GRAND TRUNK BRAKEMAN.

Tells the Story of His Exposure. The Fate that Befell Him, and how he was Relieved of His Sufferings.

W. Lavelle, G. T. R. brakeman, Allandale, Ont., says: "Through exposure I contracted that dread disease catarrh. My case became chronic. I was recommended to try Dr. Agnew's Catarrhal Powder. In ten minutes after the first application I had relief, and in an almost incredible short time all symptoms had disappeared. I feel I can not speak too strongly in recommending this remedy. It is a pleasant, safe and quick cure."

A firm faith is the best divinity; a good life, the best philosophy; a clear conscience, the best law; honesty, the best policy; and temperance, the best physic.—Franklin.

### Itching, Burning Skin Diseases.

Relieved in a day. Eczema, salt rheum, barber's itch, and all eruptions of the skin quickly relieved and speedily cured by Dr. Agnew's Ointment. It will give instant comfort in cases of itching, bleeding or blind piles, and will cure in from three to six nights. 35 cents.

Doing good is the only certainly happy action of a man's life.—Sidney.

JOHN TAYLOR & CO.,

Manufacturers, Toronto, Ont.

Too thin! That is what people say about other teas after drinking Blue Ribbon.

The doctor went, reaching the palace only just before dinner. During dinner and in the drawing room Dr. Wortle remained very pleasant. He was a man who could always be soft and gentle in a drawing room. To see him talking with Mrs. Holland and the Bishop's daughters, you would not have thought that there was anything wrong with him. The discussion

"What did he believe? When he read that article, did he see in it a true rebuke against a hypocrite, or did he see in it a scurrilous attack upon a brother clergyman, a neighbor, and a friend? If the latter, he certainly would not have been incited by it to write to me such a letter as he did. He certainly would not have sent the paper to me had he felt it to contain a foul-mouthed calumny."

"He wanted you to know what people of that sort were saying."

"Yes; he wanted me to know that, and he wanted me to know also that the knowledge had come from my bishop. I should have thought ill of any one who had sent me the vile ribaldry. But coming from

papers, he thought that the objectionable performance. He said, in point of fact, made a mistake—a stupid, foolish mistake, into which a really well-bred man would hardly have fallen. "Ought I to have advanced my ink?" and the Doctor to himself, "ought he had wandered for an hour or so, and come forth into the world. He certainly did not wish to crush himself, should he to his audience to crush the *London* cause of this sort?"

"As for the paper," he said to himself, "wandering quicker as his mind turned to this side of the subject." But for the paper itself, it is becoming his notice. What is it to me what such a publication, or even the readers of it, may think of me? As

"Was he here long?" asked Mrs. Worlie, anxiously.

"Two or three hours, mamma. He rode over from Buttercup, where he is staying for a cricket match, and of course I got him some lunch."

"I should hope so," said the Doctor.

"But I didn't think that Carewairs was so fond of the Monmouth lot as all that."

Mrs. Worlie at once doubted the declared purpose of this visit to Buttercup. Buttercup was more than half-way between Carewairs and Bowdick.

"And then we had a game of lawn-tennis. Tibout and Monk came through to make sides." So much Mary told at once, but she did not tell more till she was alone with her mother.

Young Carewairs had certainly not come over on the sly, as he may call it. But nevertheless there had been a project in his mind, and fortune had favored him. He was now about nineteen, and had been troubled for the last twelve months almost as though he had been a man. It had seemed to him that there was no possible

### Local and General

—Threshing commenced on the 15th at the College farm.

—Work on Bailey's new general store is being rapidly pushed forward.

—The polo match played on Friday night last (Canada vs. Old Country) resulted in a draw.

—Read, mark, learn and inwardly digest the advertisement of Wm. Johnston, which appears in another column.

—One hundred head of cattle were shipped to Winnipeg from this point by Mr. J. R. North, of Fort Qu'Appelle, last week.

—The annual exhibition of the Indian Head Agricultural society for grain, roots and vegetables, will be held at Indian Head on the 13th October, 1897.

—The season for shooting prairie chickens opened yesterday. We heard of one gentleman succeeding, after trudging about eight miles, in bagging one chicken.

—Cosgrove's vaudeville company and kinetoscope will play two engagements at the Fort on Saturday, Sept. 25th, and a one night engagement here on the 27th.

—A six horse team, driven by Guy May, brought in a double wagon load of flour from the Fort on Monday for Creamer & Gray, who handle this flour exclusively.

—A daily train service has been established by the C.P.R. on the Macleod and Lethbridge branches, which is a great convenience as compared with the previous service.

—The Qu'Appelle Station polo club intend holding a gymkhana on Monday, 20th inst. One of the events—the costume race—has been changed and an apple race substituted.

—The infant and only son of Mr. and Mrs. Bird died on Monday morning from infantile trouble, and was buried on Tuesday afternoon. Mr. and Mrs. Bird have the sympathy of all in their bereavement.

—A western editor has made a rule that only paid-in-advance subscribers will be permitted to give advice as to how to run the paper. He had found that the worst kickers were among the dead-heads and delinquents.

—The Lake of the Woods Milling company, having finished their new elevator at Bagot, the men have moved to this place, where work will commence at once. This will make seven new elevators built by the company this season.

—Mr. W. Curry, of Little Touchwood, on Saturday last bought 70 stockers for his ranch from the following parties, near Qu'Appelle: Messrs. Alex. Scott, A. A. M. Dale, J. Craig, A. Haines, C. Babbitt, G. Bailey, P. Carr, C. McLean and G. Bingham.

—Waghorn's Guide keeps up its high standard of excellence in the September number just published, in which is recorded all the changes in travel by rail, stage, ocean and lake, mail service, new post offices, new county court sittings, school districts, etc. The game laws of Ontario, Manitoba and the Northwest are given and may be studied with advantage by visiting sportsmen. The table of special fares, baggage and hotel privileges accorded commercial travellers, as also the table of bicycle rates on C.P.R. will be found of special service to the many interested. City and provincial maps accompany the issue, with diary pages, sun and moon tables, weather report, etc.

vice to the many interested. City and provincial maps accompany the issue, with diary pages, sun and moon tables, weather report, etc.

**Eczema Relieved in a Day**  
Dr. Agnew's Ointment will cure this disgusting skin disease without fail. It will also cure Barber's Itch, Tetter, Salt Rheum and all skin eruptions. In from three to six nights it will cure Blind, Bleeding and Itching Piles. One application brings comfort to the most irritating cases. 35 cents. For sale by Henderson & Parker.

—Mr. F. Bell placed on our table this week eight large potatoes weighing eight pounds, of the Early Rose variety. These were only half the yield of one hill. This is a magnificent yield for this season, as the conditions for potato growing were not the most favorable.

—The annual announcement of the Brandon College, of Brandon, Man., for 1897-98 to hand. Those who are planning to send their sons and daughters from home for an education, should drop a line to R. H. Sampson, box 180, Brandon, Man., for full information.

—We regret that an error should have crept in last week regarding the date of the Harvest Home services in St. Peter's pro-cathedral. The date should have read the "19th" instead of the 12th Sept. His Lordship the Bishop of Qu'Appelle will preach. Services at 8, 11 and 7.

—On Monday a party of three went out to Deep lake to slaughter ducks, but hawks and gophers occupied their attention mostly and the ducks got a rest. The party returned safe and sound the following day and are now trying to dispose of gopher fur, but the market for that article is at present very low.

—Mr. J. B. Hawkes, of Balgonie, was in town the beginning of the week. Mr. Hawkes, when asked by a reporter if he intended running as M.L.A. for South Regina, replied that such was his intention. Though Conservative in Dominion politics, Mr. H. Hawkes is by no means conservative in his politics in the Northwest, and believes in a liberal administration of affairs here.

#### One Source of Pain and Suffering Under Human Control

The remedy known as South American Kidney Cure never fails to give relief in six hours in all derangements of the kidneys or bladder. Bright's disease, diabetes, inflammation or ulceration of the kidneys, neuralgia, consumption, hemorrhage and catarrh of the kidneys, inflammation of the bladder, etc. It purifies and regulates the urine, removes sediment in urine and prevents scalding. It is worth a thousand times its cost for prostatic troubles in the old, such as enlargement, inflammation and ulceration of the prostate gland. For sale by Henderson & Parker.

—Mr. Atkinson, the evangelist, preached to large congregations in the Presbyterian church Sunday morning and in the Methodist church in the afternoon and evening. The meetings are being held nightly in the Methodist church all this week except Saturday. It is to be regretted that larger numbers do not turn out to these meetings, which are very interesting, but we suppose it is owing to the busy season.

—Albert Cavileer, of Pembina and A. Marion, of St. Joseph, N.D. have left for the Pacific coast to carry the mail for the Canadian government between Juneau and Klondyke. The mail will be carried by dog sledge and with snow shoes. They will make the trip out there with a party of mounted police. Both Mr. Cavileer and Mr. Marion are hardy and experienced men and are doubtless selected for that reason. Marion has been a frontier ranger all his life, and was in Europe with Buffalo Bill with his Wild West show. Mr. Cavileer, always fond of the shot gun and rifle, has spent the last two summers prospecting in the Rainy Lake mining country.

**Personal Mention.**  
Mr. A. Dundas, of Balgonie, spent Saturday and Sunday in town.  
Mrs. J. A. Barclay, who spent several months here this summer, visiting and looking after her farm,

**Awarded**  
**Highest Honors—World's Fair, Gold Medal, Midwinter Fair.**  
**DR. PRICE'S**  
**CREAM BAKING POWDER**  
A Pure Grape Cream of Tartar Powder.  
40 YEARS THE STANDARD.

### A Clinching Statement.

A Cure That was Permanent.

The Medicine Used was Paine's Celery Compound.

Day after day home and foreign cures are heralded as the result of using this or that medicine. It is safe to assert that many of the published letters are bogus, and many others will hardly bear the light of investigation.

The cures effected by Paine's Celery Compound, and noted in the press of the country, have all the ring of genuineness and honesty about them, and the original letters can be seen at any time by an interested public.

It has been proven in numberless instances that the cures made by Paine's Celery Compound are permanent. Another letter has just been received, this time from Mr. P. J. Kilbride, postmaster, Laverne, P.E.I., testifying to the permanency of his cure. His case was one of the most serious and critical ever given to the public, and his complete cure astonished his many friends and the residents of his town.

Mr. Kilbride says: "Over three years ago I gave you a testimonial for Paine's Celery Compound after it cured me.

"To-day I am in splendid condition, and have not been sick a single day since I used the famous Paine's Celery Compound.

"I certainly owe my present health and strength to your medicine, and I am fully convinced it saved me from a condition bordering on insanity. I can now sleep and eat well, and I thank God for Paine's Celery Compound and the great change.

"I have received and answered 250 letters since my testimonial was published. These letters came from all parts of Canada and the United States. It has been a pleasure answering these letters from sufferers, and I trust my recommendation of Paine's Celery Compound will help suffering humanity."

property and effects, returned to her home at Lethbridge on Saturday.

Mr. Burton, of Abernethy, representing the Federal Life, spent Saturday and Sunday in town.

Mrs. Edmunds, from Vancouver, arrived here last week with her children, on a visit to her parents, Mr. and Mrs. Sargent.

Mrs. Jas. Cullen, who has been on an extended visit to her mother, Mrs. Wilson, of this place, returned to her home at Caumore, accompanied by her children, on Tuesday morning.

Mrs. E. W. Warner, accompanied by Miss Beatrice Scott, who has been visiting friends in Winnipeg, arrived here Saturday morning. Mrs. Warner's many old friends are pleased to see her here again. Mr. Warner expects to arrive in a few days to enjoy a chicken shoot.

### THE OLD SYSTEM GONE.

Better and Easier Work Done by Diamond Dyes.

The dyeing of cotton rags for the making of carpets, mats and rugs was for a long time a tedious, difficult and unsatisfactory operation owing to the crude and old-fashioned dyes used that home dyers were obliged to use.

Of late years all this has been changed for the advantage and benefit of every home. Science has given the world the Diamond Dyes that have brought joy and comfort to millions of housewives.

The makers of the celebrated Diamond Dyes prepare special cotton colors such as Fast Pink, Fast Orange, Fast Purple, Fast Green, Fast Navy Blue, Fast Crimson, Fast Red Brown, Fast Yellow, Fast Scarlet, Fast Cardinal, Fast Black and other colors that are undying in washing, and fast in rain or sun. No other dyes in the world can give such wonderful results on cotton goods, and no other but the Diamond Dyes are fully guaranteed.

**Wanted.**  
Men and women who can work hard talking and writing six hours daily, for six days a week, and will be content with ten dollars weekly. Address: NEW IDEAS CO., Brantford, Ont.

### NEW STOCK

Clear Ceiling, 4 in. V, at ..... 20 00

Other lines equally cheap.

Brick and Blacksmith Coal and Hardwood always in stock.

## A Word to Farmers Round Qu'Appelle

HOW ME THE FARMER that does not like a good plow, mower or binder. In fact he likes all his implements to be the very best in the market—there are none too good for him. How's this? Simply because he can do a good day's work with less labor and with twice the comfort and pleasure. That is all right. But just here I want to say a word to Mr. Farmer. Stop and think, just for a moment. When starting out in the morning to your day's work, whistling and as happy as a clam in a swill barrel, do you ever give a thought about your poor wife, who for the last ten years has been striving and struggling, trying to cook your meals on that old, broken, cracked-up stove? You give a farther a tool like that to work with and what would be the consequences? Why, he would get mad right away, fling it over the fence, go to town and buy a new one. Is it not just the same with your wife? Perhaps you think that she would not appreciate a good stove. Do not make any mistake like that. Take one home with you and try her. Give her a show to do her share of the work as well as you. Don't be selfish and keep all the good things to yourself. When in town drop into

### WM. JOHNSTON'S

and take a look at some of the best stoves that are made in Canada. See the Famous Model! Bottom of oven sheet steel, bottom of stove covered with fire clay, thermometer in oven door to tell when your bread is cooked; ventilated oven; bolts all on outside of stove. On a trial test in the City of London, this stove baked 200 loaves of bread in seven hours. This famous stove is made by the Melbary Manufacturing Co., of London, Ont. Then take a look at the Grand Jewell, all steel oven. This is the stove that took the cake at the late Territorial Exhibition, at Regina. Made by D. Moore & Co., Hamilton. Then take a look at the Grand Souvenir, that will burn coal or wood, finished with all the latest improvements, made by the old reliable firm of Gurney & Co., Toronto. These are three of the oldest and most reliable stove makers in Canada. Their stoves are known from the Atlantic to the Pacific. Come in and see these stoves; it will cost you nothing. No trouble to show goods. I have also a full line of Steel Enamelled ware, Copper, Tin and Sheet-iron ware. Give me a call; I will make the prices right.

## BRINE & FETHERSTONHAUGH, LIVERY STABLES
